Sam Duffie Hinton Papers, 1958-1986

Physical Description: 1113 original pen and ink drawings in 7 manuscript boxes

Description: The accession includes 1113 original pen and ink drawings of marine life prepared by Sam Duffie Hinton for his column, The Ocean World, published weekly on Sundays in the San Diego Union from July 27, 1958 to February 16, 1986. The column was started by Sam Hinton when he was Curator of the Aquarium-Museum at Scripps Institution of Oceanography.

The column documents ocean life and consists of an original drawing by Sam Hinton and descriptive text including the common and scientific name of each creature, its size and a brief description of the creature. Each drawing is signed SH. A number and date is written in pencil on the front of most drawings. Some drawings have a date written in pencil or pen or stamped on the verso of the drawing. The dates are probably the date the drawing was published. The drawings document marine mammals, birds, fish, amphibians, reptiles, invertebrates, marine insects, marine plants and microorganisms.

The drawings are arranged taxonomically, although they are not in perfect order. There are several folders of drawings filed at the beginning of the accession that were not filed in the taxonomic hierarchy. The copyright for these original drawings was held by Hinton, who gifted them to UC Regents. Scrapbooks containing the published column are in Accession No. 2006-45.
